IT System Upgrade

With their continuing growth in the market place and the advance of information technology, the partners recognised the need to upgrade the firm's computer systems to meet the demands of today's technology. The firm has recently installed a complete new server and PCs together with a new case management system to streamline their business. This was done with the assistance of Sulby Solutions and A M Systems who worked closely together to ensure the smooth running of the installation. Additional training is also being undertaken so that all members of staff, from the Senior Partner down, are fully conversant with today's information technology.
